**Location:** Port Arthur, TX

**Size:** 6,000+ sq. ft.

**Award Date:** June, 2010

**Completion Date:** September, 2010

**Days to Complete:** 120

## Description

BOXX Modular provided a high-end, permanent modular 'Employee Center' at the Valero Port Arthur, Texas refinery plant site. The 6,000+ square foot facility included separate security, outpatient medical, and exercise facilities. BOXX's scope of services included the design and construction of the actual facilities, as well as a permanent foundation and site utility services.

Key features for the project included a ground-level front entry, multi-colored-stucco exterior siding & trim, specialized mechanical and gas detection systems, interior skylights throughout, hurricane-resistant building envelope, and various specialized interior aesthetic features. This design/build project was completed in roughly 4 months.

- Award Winning Designs
- Quality Construction
- Free Design Consultation
