

PHOENIX
MODULAR ELEVATOR

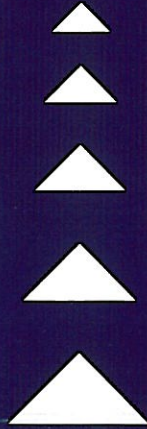

An elevator installed
in three days...

PHOENIX
MODULAR ELEVATOR

Phoenix Modular Elevator
912 S. 19th Street
Mount Vernon, Illinois 62864
618-244-2314

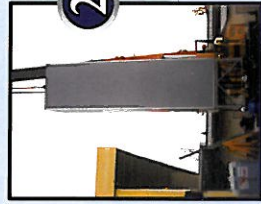

PhoenixModularElevator.com

Installation is as easy as 1-2-3

1 The elevator is completely pre-installed inside the hoistway at our production facility, loaded onto a flatbed truck, and shipped directly to your job site. At the job site, the only prep work needed is a concrete pit and door penetrations.

2 The elevator is hoisted into a vertical position with a crane, lowered into the pit, and securely attached to anchor bolts.

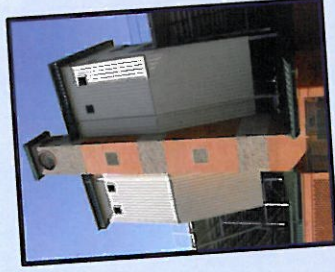

3 The wiring is connected from the car and hoistway to the machine room, hydraulic oil line is connected, and oil tank filled.

The unit is ready
for inspection and operation.

Why Modular?

- Eight week lead time on most models once drawings are approved – much shorter than stick-built.
- Three-day installation, minimizing inconvenience.
- Lower total cost.
- Suitable for new construction or retrofit.
- Up to 80 feet of travel with stacked units.
- Both ADA wheelchair compliant and stretcher compliant models available.
- Many options available for customizing the look of the car and fixtures.
