

1 RAMP AND LANDING DECK ELEVATION - LOWER  
1/2" = 1'-0"

2 RAMP AND LANDING DECK ELEVATION - HIGHER  
1/2" = 1'-0"

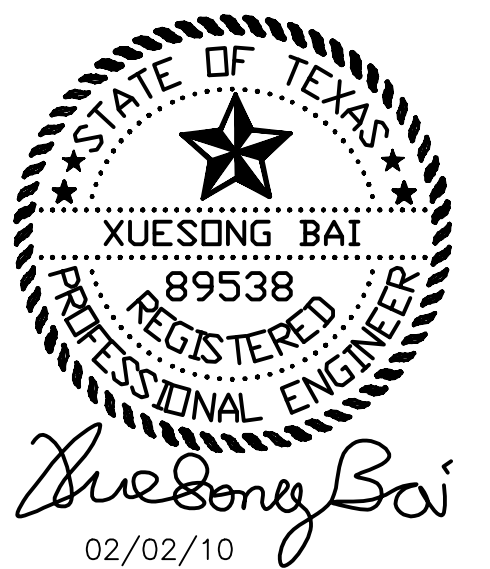

3 STAIRS AND DECK ELEVATION PLANS  
1/2" = 1'-0"

4 STAIRWAY CROSS SECTION  
1/2" = 1'-0"

PLAN NOTES:

1. Refer to the building plan for locations of wood ramps, stairs, and decks.
2. Refer to architectural and other project plans for additional details.
3. Surface drainage:  
An effective surface drainage system is vital to performance of the slab-on-grade foundation over expansive soils. All surface moisture should drain away from the building, minimum slope of 2%, and not be allowed to pond near the building perimeter.
